 - 15:10 R. Kisteleki RIPE NCC Tools Update
 - 15:25 MAT's Advisory Role (discussion)
-

MAT WG as an advisory venue a proposal / question from the chairs

MAT operates today primarily as a venue for dissemination of measurement methodologies, tools, and results of interest to the RIPE community.

MAT is also a natural home for advice to the RIPE NCC about the development of its tools (e.g. feature requests or reflections on their use).

Should we be more explicit about making time for these in the MAT WG agenda, and room for this discussion on the mailing list?
