Extra help from colleagues on the Saturday

Fiber cut at the WTC

- There was maintenance in the WTC

- Our fiber got cut because of this

- One week before the meeting!

- This was fixed quickly by our connectivity sponsor Eurofiber

WiFi

Setup Weekend

- Making sure people get blinded

- Servers (all VM's)

- Switches and AP's

- Cabling and power

- Presentation system

- Webcast

- Limitimer

- And a lot more!

FRRouting

- We moved from BIRD2 to FRR

- Everything works, also RPKI

- RPKI issue due to server reboot

- Somebody noticed and notified us through Twitter

- We will publish the configuration files here next week

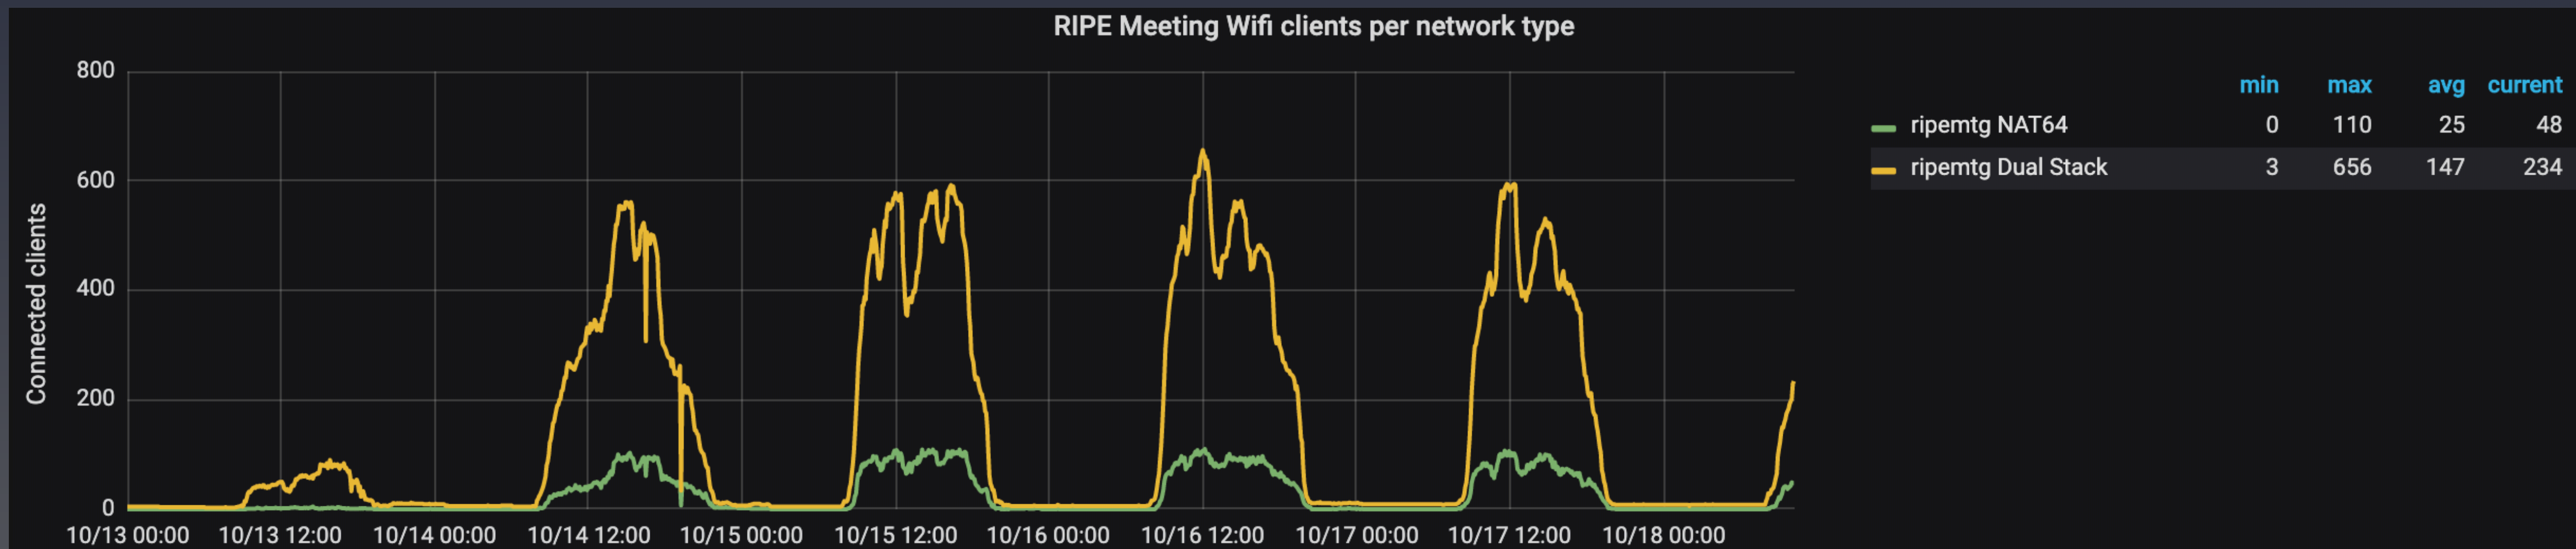

- https://gist.github.com/mschep

KEA DHCP

- Active-standby HA didn't perform well on Tuesday

- Multiple clients where offered the same IP address

- Not sure why this was happening

- Shutdown 1 of the 2 servers and all was good

- Still need to investigate what went wrong

NAT64

- ipfw on FreeBSD

- s/ripemtg-nat64/ripemtg/ ?

Questions ?
