

# **Encrypted DNS Deployment Initiative**

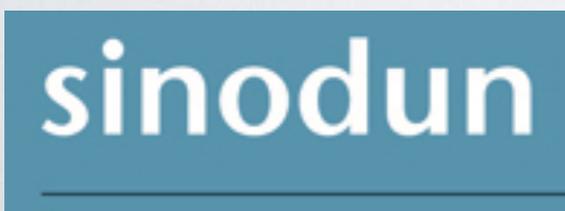

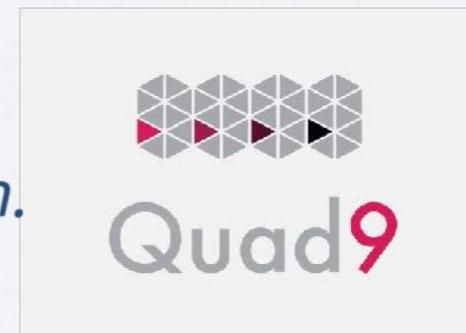

# EDDI OBJECTIVES

- To define and adopt DNS encryption technologies
- Enhance the privacy and security of users, devices and services
- Develop best practices
- Generally fill the gaps for DoH/DoT deployment

# STATUS

- Soft launch in September 2019
- Open to everyone interested in “encrypted DNS”
- Just a mailing list and website (for now)
  - **<https://www.encrypted-dns.org>**
- Not incorporated and self-organising
  - No bye-laws, membership fees, board or employees
  - Infrastructure support donated by Comcast

# SAMPLE PARTICIPANTS

# ACTIVITIES TO DATE

- Ad-hoc meetings and conf calls
  - Physical meetings will likely be adjacent to major industry events: IETF, DNS-OARC, ICANN, etc.
- Initial workstreams on github:
  - organisation, use cases, data policies, canary domain issues, metrics, testing, etc.
